

This is content for a brochure that we developed for EnviroSurvey, an environmental consulting firm that needed a glossy sales tool for meetings with customer prospects.

EnviroSurvey, Inc. (ESI) is a multidisciplinary environmental consulting firm and technical service provider. Since 1991, ESI has been providing hazardous materials management, soil and groundwater remediation, industrial hygiene, and health and safety services to clients throughout California and the West. As a dynamic company, ESI has the ability to address sophisticated problems thoroughly and effectively, delivering client-centric, professional and responsive services of the highest quality.

Headquartered in San Francisco, EnviroSurvey, Inc. is a certified Minority Business Enterprise (MBE) by the San Francisco's Human Rights Commission (HRC), as well as a certified "Small Business" by the State of California and "Hub Zone" disadvantaged local business by the United States Small Business Administration (SBA). EnviroSurvey also holds a California Class A Contractors License, CSLB # 790966.

EnviroSurvey offers a wide range of consulting and remediation services.

Engineering and Design Services

EnviroSurvey designs and develops plans for a variety of environmental projects, including:

- Soil and Groundwater Sampling and Analysis
- Groundwater Treatment
- Hazardous Material Management and Transportation
- Remedial Action
- Lead and Asbestos Compliance
- Air Monitoring
- Excavation Dewatering
- Operation and Maintenance Manuals
- Quality Assurance/Quality Control (QA/QC)
- Stormwater Pollution Prevention Plan (SWPPP)

Technical Services

EnviroSurvey provides a comprehensive range of technical services, including:

- Complete Industrial Hygiene and Environmental Health and Safety services
- Phase I and II Site Investigations, including soil and groundwater characterization
- Building surveys for hazardous materials (lead & Asbestos) in accordance with NESHAPS and HUD guidelines
- Indoor Air Quality (IAQ) investigations, including mold surveys and chemical irritants
- Environmental sampling and analysis, including air, water, and soil
- Obtaining Regional water Quality Permits (NPDES) for construction dewatering operations and storm water pollution prevention
- Technical research capabilities to identify Persistent, Bioaccumulative and Toxic Chemicals, and to categorize them on the basis of chronic or long term health effects and human exposure levels

EnviroSurvey has been in business for 15 years, serving a diverse client base of public and private organizations, including:

- State of California Department of Transportation
- California Regional Water Quality Control Board (San Francisco Bay Region)
- San Francisco Department of Public Works (Bureau of Construction Management)
- San Francisco Department of Environment (SFE) Toxic Reduction Program

- San Francisco Department of Public Health (Bureau of Environmental Health Management)
- Non-profit Redevelopment and Housing Agencies
- Construction Companies and Developers of Major Civil Projects.

Staff members are knowledgeable in all aspects of Federal and State of California regulatory requirements, and maintain professional relationships with regulatory agencies.

EnviroSurvey has extensive experience in numerous specialized fields, including environmental investigations and audits, hazardous waste management, soil remediation, water treatment, indoor air quality, industrial hygiene, and health and safety. EnviroSurvey's staff holds a range of professional certifications, including:

- California State Contractor (Class A, CSLB # 790966)
- California Registered Geologist
- Cal-OSHA Certified Asbestos Consultants
(# 93-0928)
- Certified Site Surveillance Technician (CSST)
- DHS Certified Lead Project Monitor
(DHS # 1693)
- Environmental Microbiology Laboratory (EMLab) Mold Certification
- NIOSH-582 Microscopist, University of Southern California
- OSHA HAZWOPER 1910.126

EnviroSurvey also utilizes a network of professionals, such as Environmental Scientist (PhD), Certified Industrial Hygienists (CIH) and California Professional Geologists (RG) and Certified Laboratories whose involvement and input has assisted ESI in completing various projects. These individuals remain committed to supporting ESI, on an as-needed basis, throughout the design and implementation of various phases of a project. EnviroSurvey maintains membership status with the following industry associations:

- AIHA (American Industrial Hygiene Association)
- ASM (American Society of Microbiology)
- AOAC International (Association of Analytical Chemists)

EnviroSurvey and Environmental Responsibility

EnviroSurvey is committed to our clients, our employees, our communities, and our natural resources. We recognize that health, safety, and a sustainable environment are fundamental to society. As responsible corporate citizens, EnviroSurvey conducts all of its operations in a manner that supports these values. We practice strict adherence to the following standards:

- Provide clients with the highest quality service, meeting established environmental standards at competitive pricing.
- Employment of sound environmental practices throughout all operations, including waste minimization and pollution prevention procedures.
- Full compliance with both the rule and the intent of applicable environmental laws and regulations.
- Minimization and mitigation of adverse environmental impacts of construction and development.
- Training of all employees in health and safety, operations, and general sound environmental practices.
- Participates in Green business Initiatives.
